

Wall Exhaust

Characteristics:

- Easy to install
- 26 ga. galvanized steel construction
- Silent and maintenance free
- Removable grill for easy cleaning
- Rodent proof
- Polyester powder coat finish
- Available in 3", 4" and 6" diameter exhaust pipes
- Custom colors and sizes available upon request

Details and Description:

- The wall exhaust is constructed so as to prevent the infiltration of water, avoiding ice formation on the inner cover and the entry of cold air into the home.
- The exhaust and the grill are made out of galvanized steel, preventing perforation and intrusion from rodents and birds.
- 9" tail pipe eliminates the need for joints and extensions, allowing smooth air flow.
- Exhaust is angled down and out, preventing lint and dirt from accumulating on the exterior wall.
- For use with kitchen range hoods, bathroom fans and dryers. NOTE: Accumulation of lint in dryer vents has been proven to be a fire hazard. Therefore, when used with dryers periodic cleaning of the grill is necessary.
